

MEASURING AND ORDERING INSTRUCTIONS FOR 1" X 1" PORCH SCREEN ENCLOSURES

All 1" x 1" porch enclosure screens must be submitted as tip-to-tip (manufactured) sizes only. We will not accept any orders with opening sizes. To determine tip-to-tip sizes note the following:

Note: These instructions apply only when the 1" H, 1" F, 2" F, and corner section accessory channel system are used in conjunction with the 1" x 1" porch screens. (See porch enclosure literature for details.)

WIDTH*

1" x 1" porch screen widths are manufactured on any 1/16" increment. To determine screen width to be manufactured, deduct 1/2" for each screen that is being installed into the opening.

HEIGHT*

1" x 1" porch screen heights are manufactured on any 1/16" increment. To determine screen height to be manufactured, deduct 1 1/2" from each screen that is being installed into opening.

EXAMPLE

<u>OPENING SIZE</u>	<u>SCREENS PER OPENING</u>	<u>TIP-TO-TIP SIZE</u>
60" wide x 75" high	2	29 1/2" x 73 1/2"
98 1/4" wide x 80" high	3	32 1/4" x 78 1/2"

When using the Newport Screen Door in conjunction with the 1" x 1" porch enclosure and the 1 3/4" x 1 3/4" door tube – note the following:

Note: After the screen door opening is determined, you must allow an additional 4" in the overall opening width to provide clearance for the 1 3/4" door tube to be secured on each side of the screen door. Allow an additional 2" in the overall opening height to provide clearance for the 1 3/4" door tube to be secured above the door.

***NOTE WELL:** These instructions are provided as a guide only to help in sizing porch enclosure screens and doors. It does not take into account variances in openings (i.e. out of square openings, pitched floors or slabs) or other unusual field conditions. Lockheed Window Corp. assumes no liability for submitted TTT measurements. We do not supply any field fasteners, anchors, brake metal, caulking, etc. with assembled porch enclosure screens and accessories.
